## Secondary Custom Function Keys

1. Select the “**DEVICE**” tab.
2. Select the “**FN1 Layer**” tab.

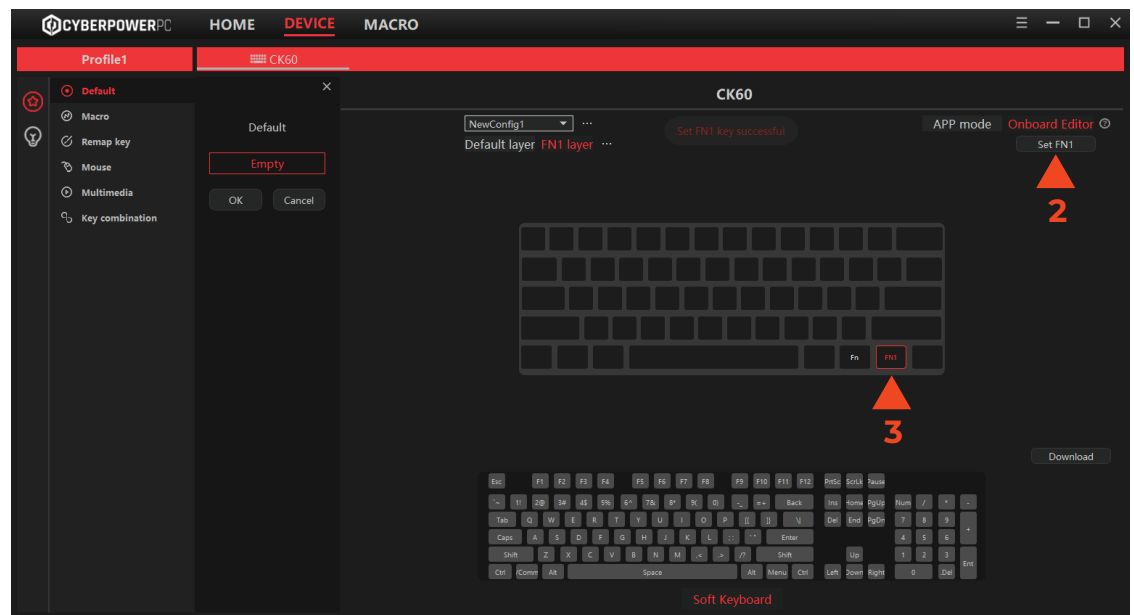

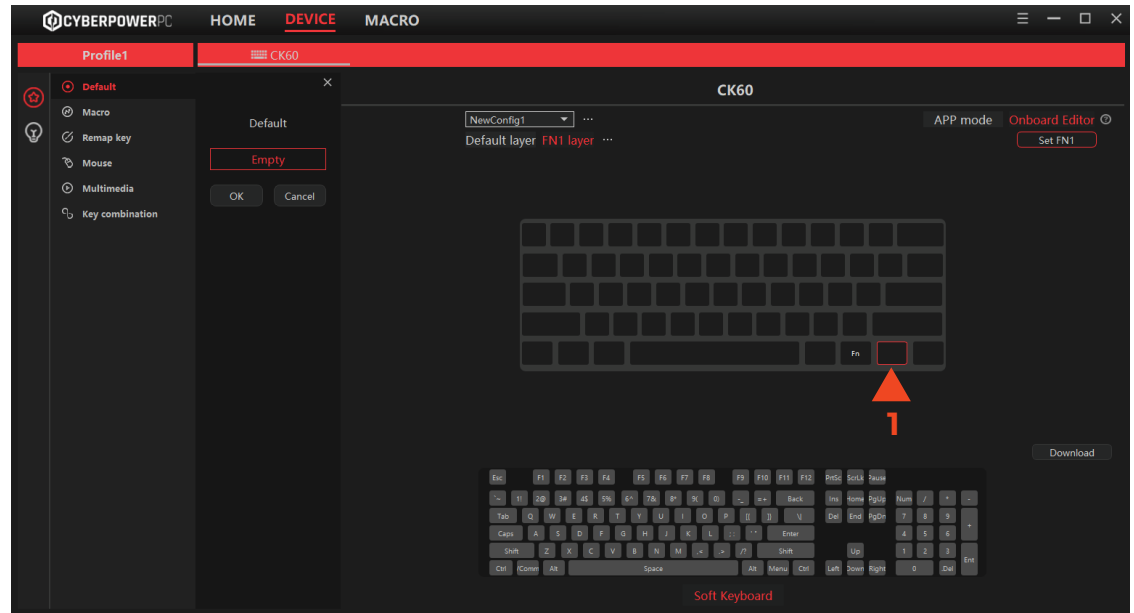

## Secondary Custom Function Keys

1. Select any key to assign as your secondary function key.

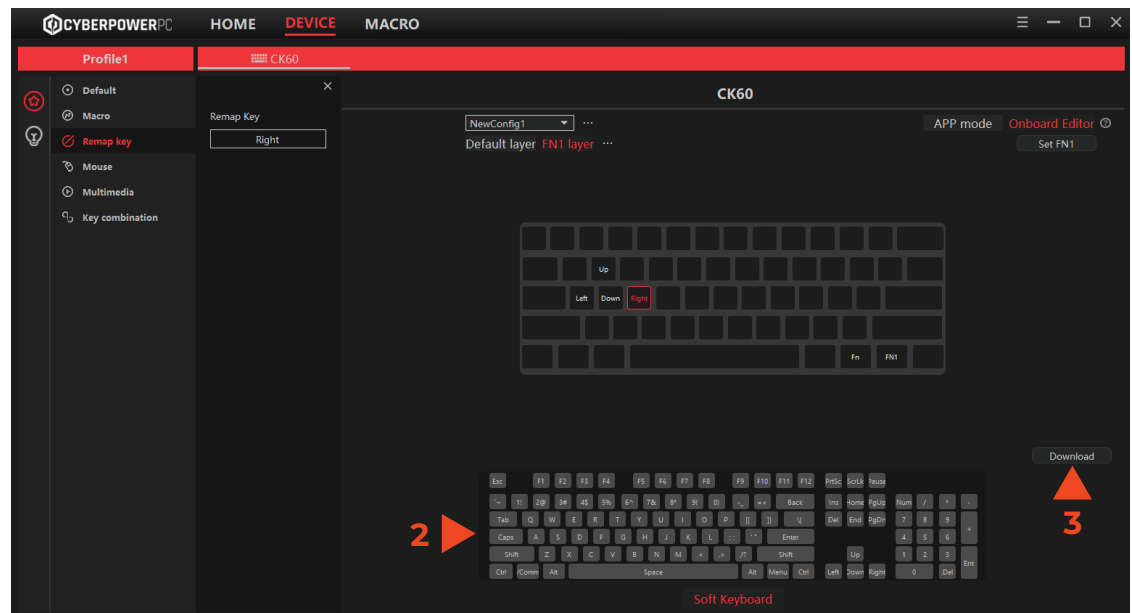

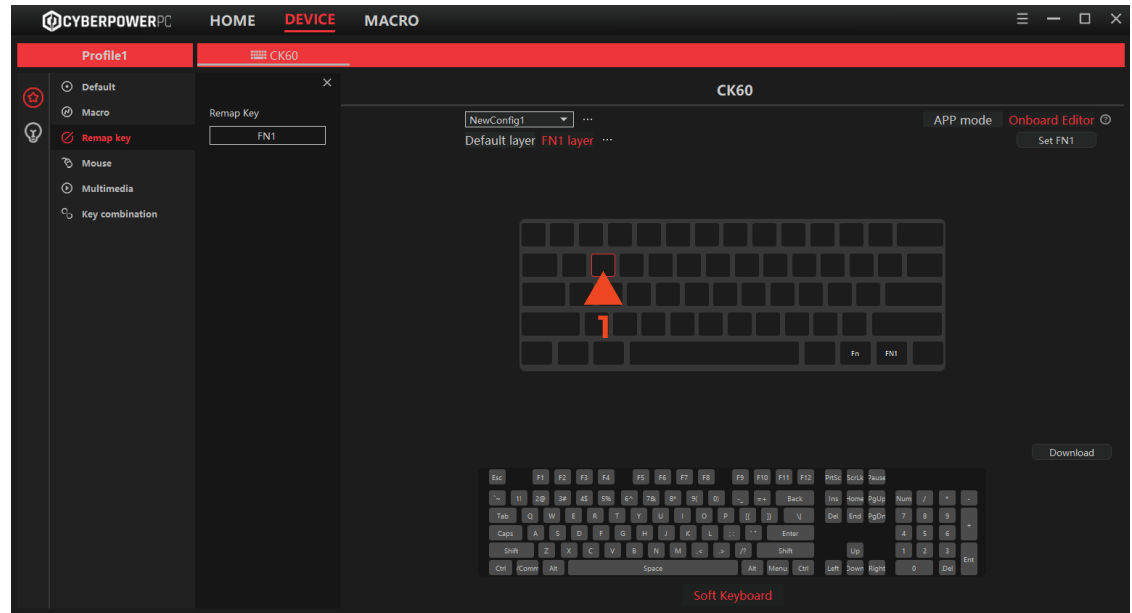

Note: We recommend the “Super” key since it is not preset with any functions.

2. Click on “**Set FNI**” to assign the selected key as your secondary function key
3. You’ll see that the key is now labeled “**FNI**”

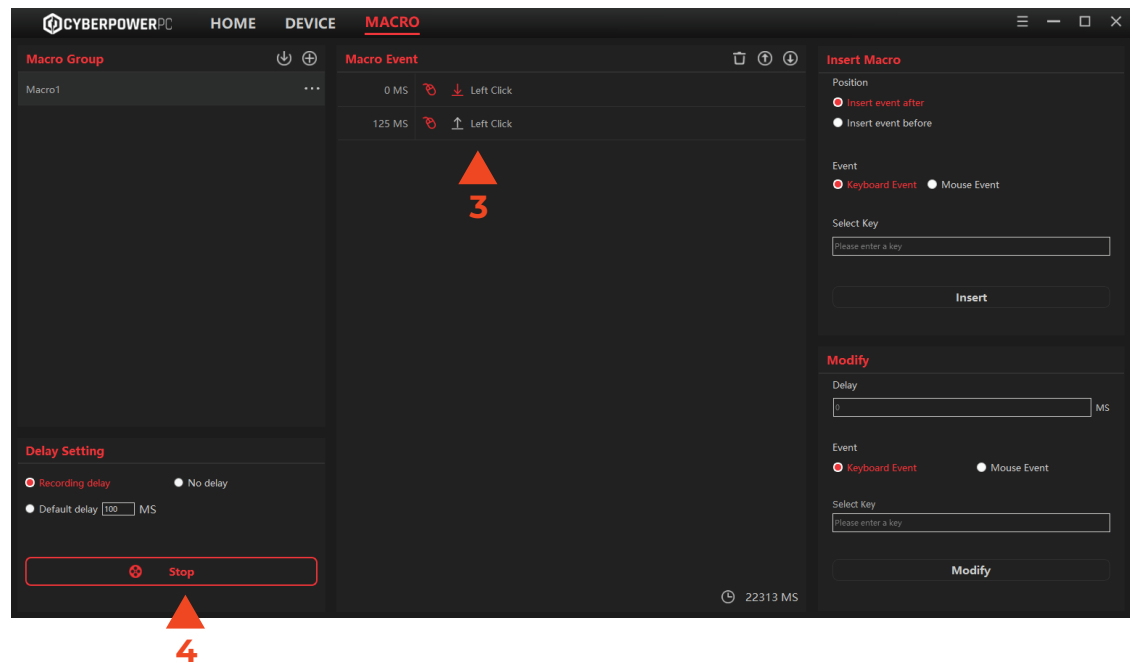

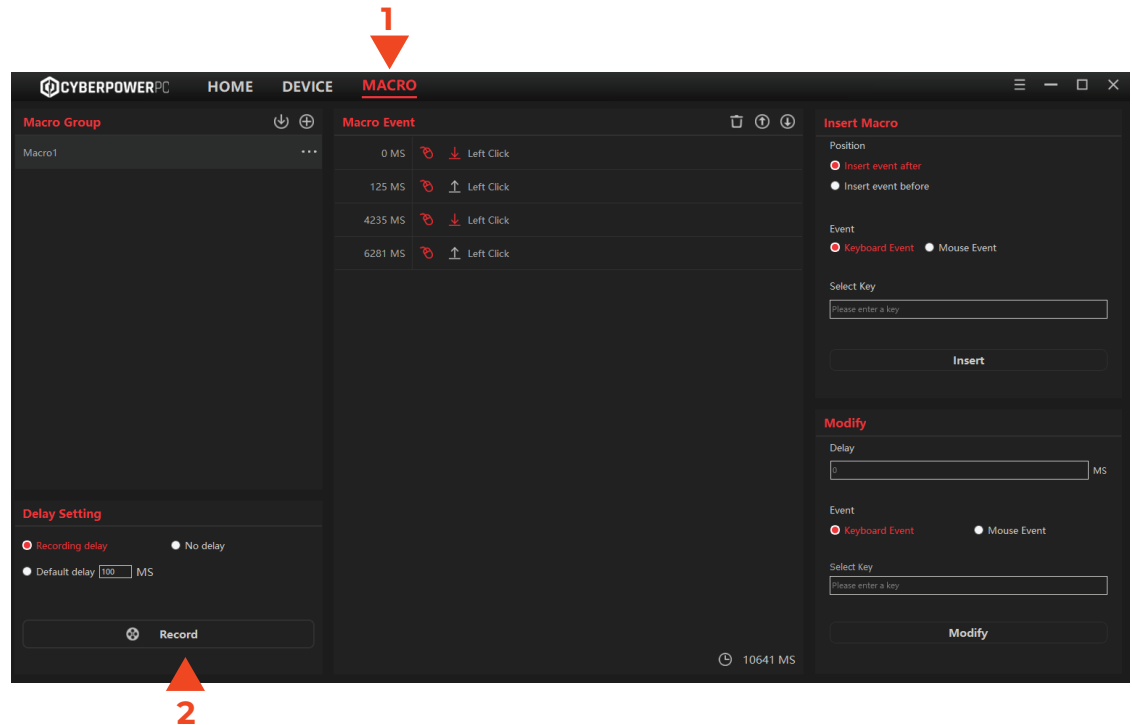

## Assigning Secondary Functions

1. Select any key you want to assign a secondary function to.
2. Once a key is selected, choose a key that you want to assign to it from the “**Soft Keyboard**” below.
3. Once you have completed assigning your new secondary functions, click the “**Download**” to update your keyboard functions.

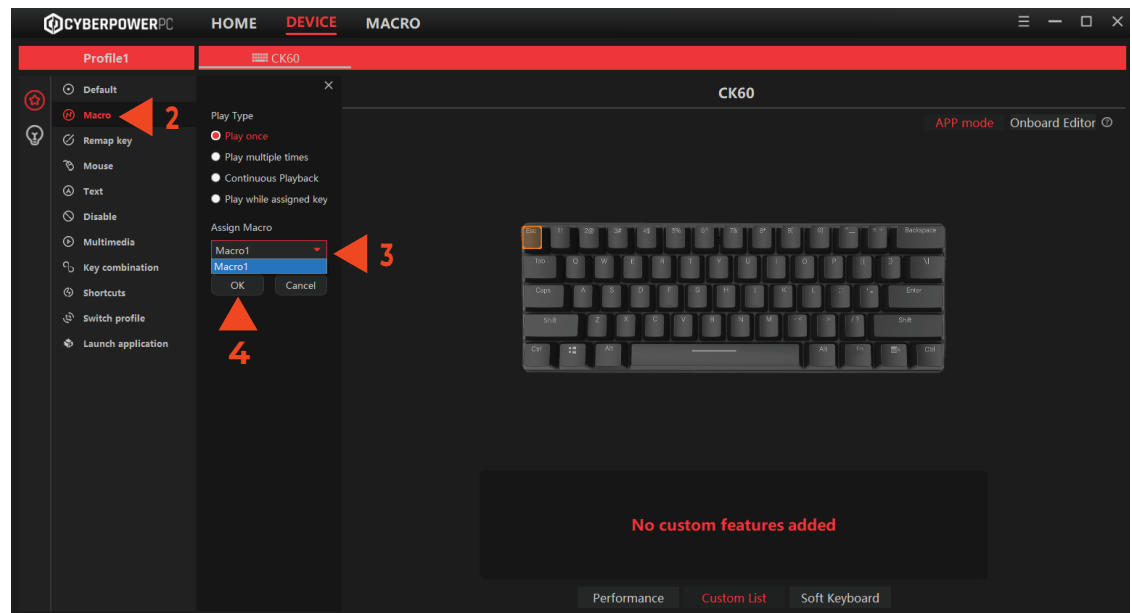

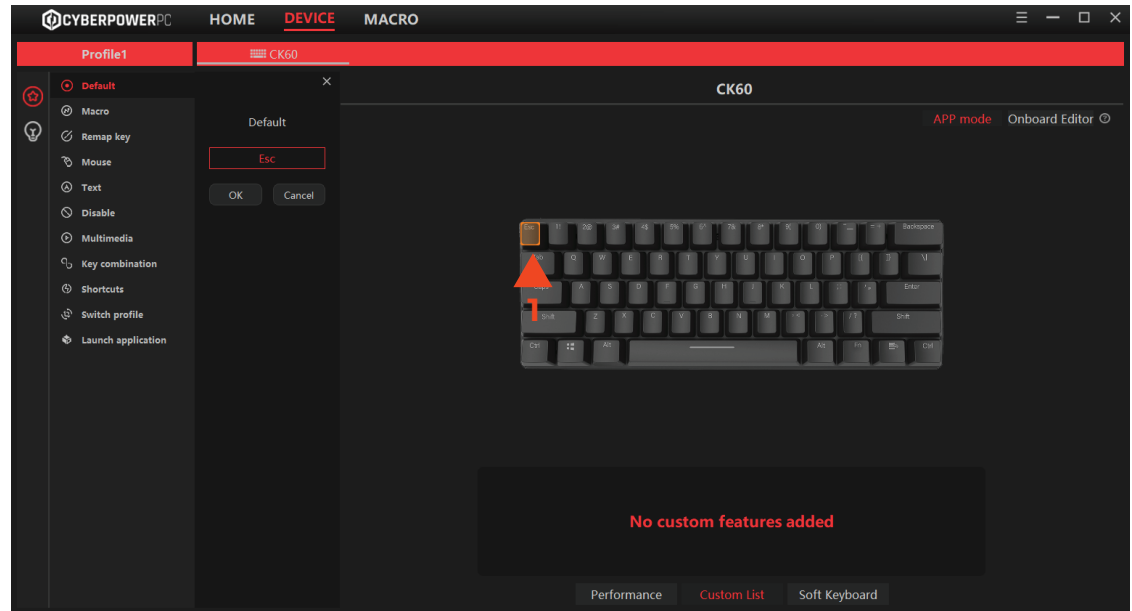

## Creating Macros

1. Select the “**MACRO**” tab.
2. Select the “**Record**” tab.
3. Click your macros keys to begin adding them to your recorded Macro Event.
4. Click “**Stop**” when the macro is complete.

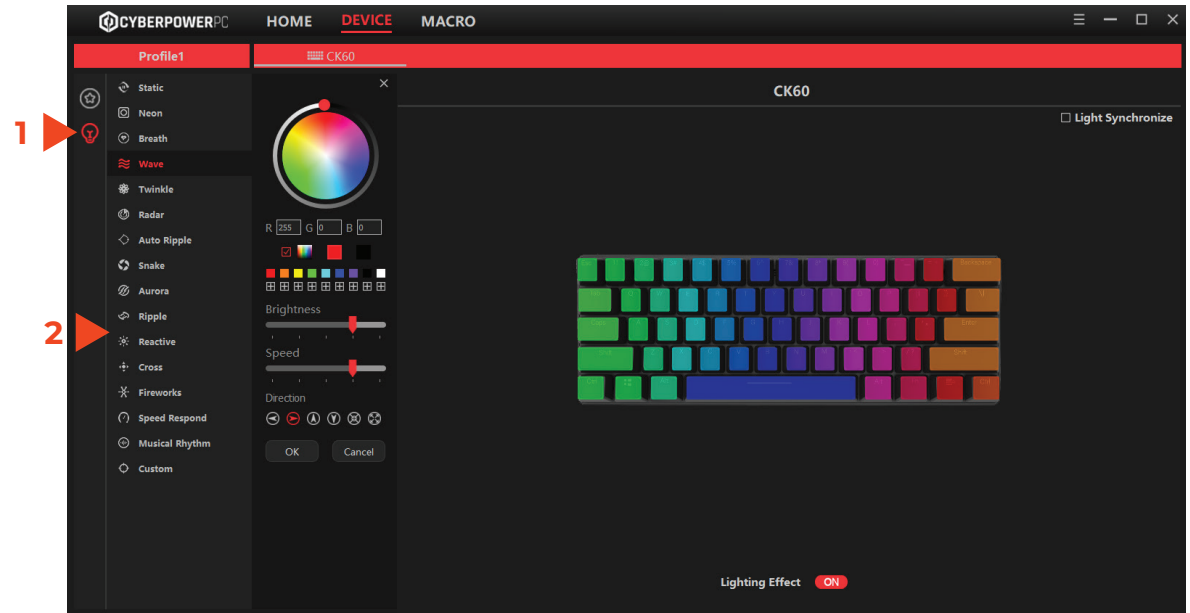

## Assigning Macros

1. Select the key you want to assign your macro to.
2. Select **“Macro”** from the side navigation under “Profile”
3. Select the macro you created earlier from the drop-down menu
4. Click **“OK”** to assign the macro to the selected key.

## Customizing Lighting Modes

1. Select the “**L**ighting” icon.
2. Select the mode.

## Customizing Key Lighting

1. Select “Custom” from the lighting options.
2. Select the key you want to customize.
3. Select the color you want to assign and adjust the settings.
